special issue

On occasion of Prof. Gabriel Altmann's 80th anniversary

The International Quantitative Linguistics Association would like to express Prof. Gabriel Altmann its cordial congratulations on his 80th anniversary on May 24, 2011.

On this occasion we would like to announce that a Member Area has been opened on the IQLA homepage <http://iqla.org/>. This is not, of course, the final version of the Member Area; we rather intend to honor the jubilee, on the one hand, and to provide valuable material on his scientific work, including the complete bibliography of his academic works both in Citavi and RIS style, on the other.

Furthermore, the newly created Member Area offers Professor Altmann's "historical" lectures in electronic form:

1. Statistik für Linguisten I.
2. Statistik für Linguisten II.
3. Statistik für Linguisten III.

The scripts have been written down by Professor Werner Lehfeldt, who has personally attended the lectures at the University of Bochum (Germany), and they have been prepared for electronic publication on the occasion of Professor Altmann's anniversary. The Member Area is password-protected; all members of IQLA will be informed about details of access by a separate e-mail.

Sincerely yours

Reinhard Köhler	President
Peter Grzybek	Vice President
Emmerich Kelih	Secretary General
Ján Mačutek	Treasurer
