QUALICO 2016   Trier, 24 – 28 August 2016

Wednesday, August 24th

Venue: University Trier, Campus I, Building C, Room 22

15:00-18:00	**Early registration** (https://www.uni-trier.de/index.php?id=15160)

Thursday, August 25th

Venue: ERA Conference Centre, Trier, Ausonius and Helena Rooms

	AUSONIUS
9:00-10:00	**Registration and Welcome Coffee**
10:00-10:30	**Welcoming Speeches**
10:30-11:00 **11:00-11:30** **11:30-12:00** **12:00-12:30**	**Talk by Arjuna Tuzzi, President of the IQLA**

12:30-14:00   **Lunch break - 90 minutes**

	GRATIANUS	HELENA
14:00-14:30	**Miroslav Kubát & Radek Čech** *Dynamic development of vocabulary richness of text*	**Reinhard Köhler** *Text characterization using syntactic motifs*
14:30-15:00	**Makoto Yamazaki** *Coherence and quantitative measures of text*	**Heng Chen & Xinying Chen** *Do L-motifs and F-motifs co-evolve with word length?*
15:00-15:30	**Peter Grzybek** *Word length research: Coming to rest. Or not?*	**Jingqi Yan** *The rank-frequency distribution of part-of-speech motif and dependency relation motif in the deaf learners' compositions*

15:30-16:00   **Coffee break - 30 minutes**

	GRATIANUS	HELENA
16:00-16:30	**Hermann Moisl** *The mathematics of meaning*	**Katharina Prochazka & Gero Vogl** *A diffusion model for language shift in Austria*
16:30-17:00	**Li Haotian** *Quantitative properties of the dialogue in Brothers Karamazov*	**Emmerich Kelih** *How plausible is the hypothesis that the population size is related to the phoneme inventory size? Comments from a quantitative linguistics point of view*
18:00-20:00	**Meeting of the IQLA members, building C, Room 22, University Trier, Campus I** (https://www.uni-trier.de/index.php?id=15160)	

Friday, August 26th

	GRATIANUS	HELENA
9:00-9:30	**Hanna Gnatchuk** *Testing hypotheses on English compounds*	**Yingxian Zhang & Yue Jiang** *A VSM-based algorithm for comparing online translation and human translation of English passives into Chinese*
9:30-10:00	**Yuichiro Kobayashi**, **Misaki Amagasa & Takafumi Suzuki** *Investigating the chronological variation of lyrics of popular songs through lexical indices*	**Jiří Milička & Karolína Vyskočilová** *Models of noisy channels that speech gets over*
10:00-10:30	**Relja Vulanović & Oliver Ruff** *Measuring the degree of violation of the One-Meaning–One-Form Principle*	**Martina Benešová**, **Dan Faltýnek & Lukáš Zámečník** *Functional explanation in quantitative linguistics*

10:30-11:00   **Coffee break - 30 minutes**

	GRATIANUS	HELENA
11:00-11:30	**Aiyun Wei, Haitao Liu & Jingqi Yan** *Quantitative features of vocabulary in Zhuang Language*	**Gertraud Fenk-Oczlon** *Are some languages spoken more quickly than others? A quantitative typological study*
11:30-12:00	**Xinying Chen & Heng Chen** *A diachronic study of Chinese words based on Google N-gram data*	**Wei Huang** *Script complexity distribution based on construction theory of Chinese character form*
12:00-12:30	**Lu Wang** *Polyfunctionality studies in German, Dutch, English and Chinese*	**Olga Nevzorova**, **Alfiia Galieva & Dzhavet Suleymanov** *Assessment of linguistic complexity of the Tatar language using corpus data (an attempt to study)*

| 10:30-11:00 | **Lunch Break12:30-14:00** | | **Lunch brea** |

	GRATIANUS	HELENA
14:00-14:30	**Edward Klyshinsky & Varvara Logacheva** *Quantitative evaluation of morphological ambiguity of European languages*	**Haruko Sanada** *Quantitative interrelations of properties of the complement and the adjunct*
14:30-15:00	**Adam Pawłowski**, **Krzysztof Topolski, Piotr Malak, Jan Kocoń & Michał Marcińczuk** *Statistical distributions of lexeme frequencies in a text corpus. A comparative analysis*	**Petra Steiner** *Quantitative properties of case syncretism and valency of Indo-European languages*
15:00-15:30	**Rafał L. Górski & Maciej Eder** *Four cases of diachronic change in Polish, and Piotrowski law*	**Radek Čech, Ján Mačutek**, **Michaela Koščová & Markéta Lopat-ková** *Quantitative analysis of syntactic dependency in Czech*

| 15:30-16:00 | **Coffee break 30 - minutes** |

	GRATIANUS	HELENA
16:00-16:30	**Jacques Savoy** *Stylistic evolution of US political speeches*	**Ramon Ferrer I Cancho** *Why verb initial languages are less optimized with respect to dependency lengths than other languages?*
16:30-17:00	**Yaochen Deng** *Statistical regularities of referential cohesion in English texts*	**Hongxin Zhang, Haitao Liu & Bingli Liu** *Distribution of combined structures of parts of speech and syntactic functions*

Saturday, August 27th

	GRATIANUS	HELENA
9:00-9:30	**Andrei Beliankou & Sven Naumann** *Syntactic complexity of dependency structures*	**M. F. Ashurov & V. V. Poddubny** *Stream-based RF-measure in text classification*
9:30-10:00	**Lukáš Zámečník**, **Vladimir Matlach & Dan Faltýnek** *Statistical trends manifested in protein analysis (Case stuy QUITA)*	**Juhong Zhan & Yue Jiang** *Application of quantitative linguistic properties to translatorship recognition*
10:00-10:30	**Peter Grzybek & Ernst Stadlober** *Why the lognormal distribution seems to be a good model in quantitative film analysis*	**Michele A. Cortelazzo, Paolo Nadalutti, Stefano Ondelli & Arju-na Tuzzi** *Authorship attribution and text clustering for contemporary Italian novels*

10:30-11:00   **Coffee break - 30 minutes**

	GRATIANUS	HELENA
11:00-11:30	**Elena Yagunova & Tatiana Nikulina** *Context predictability methods in Twitter social network analysis*	**Georgios Mikros, Vassiliki Pouli & Ephtychia Triantafyllou** *Personality prediction in Facebook status updates using multilevel N-gram profiles (MNP) and word features*
11:30-12:00	**Katharina Prochazka & Gero Vogl** *Using physics to model language diffusion: benefits and challenges*	**Hao Sun & Mingzhe Jin** *Authorship attribution of Yasunari Kawabata's Novels: Who Actually Wrote Otome no minato and Hana nikki**
12:00-12:30	**Patrick Juola, Sean Vinsick & Michael V. Ryan** *Are most people on Twitter introverts? A distributional analysis of personality types on Twitter*	**Martina Benešová & Petra Vaculíková** *Segmentation for MAL on content-semantic levels*

12:30-14:00   **Lunch break - 90 minutes**

	GRATIANUS	HELENA
14:00-14:30	**Sheila Embleton**, **Dorin Uritescu & Eric S. Wheeler** *An expanded quantitative study of linguistic vs geographic distance using Romanian dialect data*	**Xiaxing Pan**, **Bingli Liu & Xinying Chen** *Harmony in diversity: language data codes in English-Chinese poetrytranslation - Quantitative study on Shakespearean sonnets translation*

Sunday, August 28th

Cultural programme, information will follow.
